

The ROI of MadeAi™ for Literature Reviews

MadeAi's AI-enabled literature review solution, MadeAi-LR, is designed to save researchers time. The model below demonstrates how MadeAi-LR's proven AI capabilities are leveraged to accelerate certain phases of the literature review process.

Phase of Literature Review Process	Human Approach (Hours)	Using MadeAi-LR (Hours)	Savings (%)
Protocol Creation	2	0.08	96%
Search	2	0.08	96%
Deduplication	4	0.008	100%
Title & Abstract Screening	400	80.20	80%
Full-Text Screening	320	200.50	37%
Full-Text Purchase & Management	10	5.00	50%
Risk of Bias Assessment	40	10	75%
Data Extraction	20	10.25	49%
Individual Article Summary	120	50.5	58%
Literature Synthesis	25	10.17	59%
Literature Review Report	80	50.2	37%
PRISMA Chart	4	0	100%
Total	1,027	417	

~60% Savings

Traditional literature reviews in life sciences are slow, resource-intensive, and expensive. On average, in-house teams spend over **1,000** hours and **\$90,000** to complete a single review. **MadeAi changes that.**
